

Permitting and Approval Manager

EnBW Asia Pacific
Location (City): Taipei, Taiwan
Job Type: Full time

Here's what you need in order to be considered for this position:

- A Master's degree within the natural sciences. Preferred environmental engineer or biologist.
- 5+ years' experience in the development and application of renewable energy projects
- Proven track record of preparing and filing regulatory applications for large maritime infrastructure projects according, preferable Offshore-Wind
- Strong knowledge of coast regulations and rules for renewable projects, ideally you have a strong network within the wind energy community
- Serve as the face of the Company with regulatory authorities and consultants
- History of maintaining regulatory timelines to ensure submission timelines are met

Your duties:

- You are part of a team and responsible within that team to obtain documents to facilitate the permit application process. You obtain all required approvals for permits and act as liaison between the project and each relevant authority. Prepare and submit applications, review any plans, coordinate paperwork and applications with outside consultants as necessary. You coordinate with the entire project team to solve any plan deficiencies and mitigate permit comments. You maintain files relating to site plan applications, approvals, licenses and permits. You ensure that the permits are processed in a timely manner.
